

Kavindu Gayantha

Data Science undergraduate

kavindugayanth178@gmail.com | +94-777469788 | Negombo, Sri Lanka | [LinkedIn Profile](#) | [Github Profile](#)

PROFILE SUMMARY

Second-year Data Science undergraduate with an interest in data analytics, machine learning, and web-based system development. Skilled in Python, Java, JavaScript, SQL, React, Node.js, and Spring Boot, with hands-on experience in academic software projects. Seeking an internship opportunity to apply technical knowledge, improve problem-solving skills, and gain industry experience.

EDUCATION

Bachelor of Science in Information Technology (Specializing in Data Science)	(2024 - present)
Sri Lanka Institute of Information Technology (SLIIT)	
G.C.E. Advanced Level – Bandaranayake College, Gampaha	2023(2024)
Physical Science Stream 1C's & 2S	
G.C.E. Ordinary Level – Bandaranayake College, Gampaha	2020(2021)
9A's	

PROJECTS & EXPERIENCES

Web-based Voting System for Award Nominations

Java, Spring Boot, MS SQL

- Built a web-based voting platform to support award nomination, user voting, and result management workflows.
- Developed backend operations using Spring Boot and managed relational data with Microsoft SQL server.

Medical Appointment Scheduling System

Java, JSP, Servlets, HTML, CSS, File Handling

- Built a web-based appointment scheduling system to manage patient bookings, doctor availability, and appointment records.
- Developed the application using Java Servlets and JSP, with file-based data storage for managing system information.

Paddy Disease Classifier

Python, TensorFlow, Keras, Streamlit, NumPy

- Built a CNN-based deep learning model to classify paddy plant diseases from leaf images for agricultural disease detection.
- Developed a Streamlit web application to support image upload, preprocessing, real-time prediction, and confidence score visualization.

Mall Customer Segmentation System

Python, Flask, Scikit-learn, Pandas, NumPy

- Built a customer segmentation model using machine learning techniques to analyze customer behavior for business and marketing insights.
- Developed a Flask-based web interface for data input, segment prediction, and personalized strategy recommendation.

Home Automation System

- Developed a smart home automation prototype to control household functions such as door access, lighting, and fan operation.
- Implemented mobile/app-based control using Blynk/Bluetooth interface.

CERTIFICATIONS

AI/ML Engineer Stage 1, SLIIT — *Dec 2025*

Python Essentials 1, Cisco — *Jan 2026*

JavaScript Essentials 1, Cisco — *Feb 2026*

Python for Beginners, University of Moratuwa — *Jan 2025*

Web Design for Beginners, University of Moratuwa — *Mar 2025*

Technical SKILLS

Programming: Python, Java, JavaScript, C, SQL

Web Development: HTML, CSS, React.js, Node.js, Express.js, JSP, Servlets, Bootstrap, Thymeleaf

Databases: MongoDB, MySQL, Microsoft SQL Server

Machine Learning / Data Science: Pandas, NumPy, TensorFlow, Keras, Scikit-learn, Classification, Clustering, Data Visualization.

Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Streamlit, Flask, Arduino IDE, Postman

Concepts: MVC, Agile, REST APIs, OOP, CRUD, File Handling

Soft Skills

Problem Solving

Teamwork

Communication

Analytical Thinking

Time Management

Adaptability
